---

This game all over WWE 2K. An in depth management simulation of the wrestling world. It takes you completely backstage of all the things that takes place behind the scenes of the real world. You can pretty much take an idea and put it to paper, but you'll soon find that the idea is either not worth it or it simply worked out for you. You have to understand every wrestler you have with a gimmick, their salary, the scheduling (whether you book them in a show too many times or not enough), learn how to build the momentum of a worker or to completely destroy their entire career, you can customize absolutely everything, and you can fall in love with the in depth micro managing side of things. The best part of this game, is that the modding community is mind blowing, from fantasy creations to updated real world mods. Currently, this modding community is somewhat lackluster since TEW16 has been out (which I own), but sadly it isn't on Steam, which it really should be. I go back and forth, as TEW13 has a better design layout in my opinion, but TEW16 is less buggy and has more features that makes a difference between the two. If you love management games, spending hours upon hours customizing, and love wrestling, this is the game you NEED.. I wanted a wrestling game where I could do more of the owner/manager role that the Smackdown vs Raw mode gave in the SVR games on PS2 and not so much the wrestling, cause I royally suck lol! This game gives exactly that. You can download facepicks, title belts, promotionis, premade scenarios, etc off the company's forums to get the modern rosters and companies. You can use the game's made up roster and companies. Or you can go full custom and make all the rosters, promotions, titles, tv companies, etc; yourself! Pretty awesome. I actually had one where I took modern wrestlers into my company and gave them all "Alternate Egos" (aka Gimmicks) as Pokemon and had them battle for badges instead of titles lol. I would have a randomizer select a Pokemon for each person so I had people like Adam Copeland (Edge from WWE) as Starmie and changed his picture to the pokemon. And I think Chavo Guerrero Jr ended up as Moltres or something? Was a lot of fun and I got a lot of enjoyment out of it! The hours are a wee bit inflated but, most of them are legit.. How do I download mods with it on steam, just seems complicated. This game all over WWE 2K. Great game, do not buy through steam, they don't allow you too access the system files and so you can't add content. Much needed. Waste of money here.. Very fun to play, you can customize everything!! Great game if you have ever wanted to run a wrestling promotion like WWE, NJPW or even ROH, this game is for you, while I'd go for the 2016 version, TEW 2013 still is a great purchase on Steam since you don't need a e-license.. Quite hard to master, but this is absolutely a solid game for the future Pro Wrestling Booker!!!
